Projects

4U Academy - *led the development of a comprehensive web platform for an ed-tech startup.*   Oct, 23 - Jan, 24

- Implemented **responsive design** system for landing, about, courses, placements pages, **carousel** for student reviews
- Created these pages using **React** & styled them with help of **Tailwind CSS** & **Bootstrap**
- Utilized locally stored data in **JSON** format to dynamically load and render course cards & placement card details
- **Deployed** website to Netlify & connected to **GoDaddy** domain name

React.js, Tailwind, BootStrap, Deployment   4U Academy | Github

QKart - *an E-commerce application designed and developed to cater the needs of customers.*   Aug, 23

- Implemented the core logic for registration, **authentication**, shopping cart and checkout using **React.js**
- Improved UI by adding **responsive design** elements for uniform experience across different devices
- Utilized **REST APIs** to dynamically load and render data served by the backend server

React.js, Material UI, Git, HTTP, REST APIs, JSON   QKart | Github

QTrip - *a travel website aimed at travelers looking for a multitude of adventures in different cities.*   May, 23

- Created web pages using **HTML** and **CSS** and made them dynamic using **JavaScript**
- Improved UX with multi-select **filters**, image **carousels**
- Implemented **conditional rendering** of page elements
- Utilized **localStorage** to persist user preferences at client-side and facilitated reservation form submission using fetch API

HTML, CSS, JavaScript, REST APIs, HTTP, Bootstrap   QTrip | Github
